### SOLUTION

- Update the module used in the vehicle with the latest CH5 (1.6 or newer) Firmware currently available at [www.idatalink.com](http://www.idatalink.com). Do not use a new module.
- No installation (wiring) changes are required.
- Reset and relearn the module to the vehicle. Refer to the programming section of the latest related "CH5" install guide if needed.
- To support its dealer network, ADS has implemented a compensation program to assist in covering some of the labor costs associated with re-flashing the module for the case mentioned above. A \$25 refund will be issued by completing the attached claim form and submitting it by email to [claims@idatalink.com](mailto:claims@idatalink.com) OR by fax to 514.807.2999 before December 31th, 2009.
